

17 December 2018

Enclosure	Lion	General Health	Long Term Treatments	2018/10/06: Deworming Quantel	2018/12/01	Yearly Vaccinations
9A	Leo	Good health & Condition. Noticed a change in his left eye. Send Dr Caldwell a video: "There is a posterior lens avulsion. So lens is floating in the posterior chamber of the eye. In general the ophthalmologists don't operate on this so if too much discomfort then enucleation required."			Confortis	Awaiting Dr Caldwell to confirm dates
9A	Muneca	Leo & Muneca were moved to a smaller special needs enclosure on 21/11/2018. Both lions are very relaxed and enjoy the company of Ricardo which is their new neighbour. The enclosure is 40x40m (1,600 square meters) + 2 feeding rooms of 2x2m (4 square meters) each. The enclosure has a water crip, tent, hay bale and lush natural trees and bushes. They are both in good health & condition.			Confortis	
9	Ricardo	Good health & condition. Still separated from E&S.		Dewormed	Confortis	
9	Easy	Good health & condition. Still separated from R.		Dewormed	Confortis
